Dear Sir/Madam

Re: NOVA PROJECT – Letter of Endorsement _ Stanza

After meeting Stanza in our London offices, we were introduced to the above competition which we were asked to comment on.

We have been aware of Stanza's work for several years and have been supportive of his investigation of data collecting and data visualising especially with regards to architectural integration.

We confirm that we fully endorse Stanza's work and would be happy to collaborate with him on this prestigious project.

Yours sincerely
for Vector Foiltec

Armand Terruli
Associate Director
